

# 高纯砂专用生产设备

## Dry Quartz- Processing Equipment

! " # :

This machine is specially designed for quartz- making field for glass industry. It is composed of mill, sieve (for different size product), coarse material- returning system, and dust- collecting system. And you can get the product from different sieve with size 60- 120 mesh for glass industry. The size for powder material coming from dust collector is about 300mesh (you can use this for other business).
